| EAN:                               | 4013456582217                   |
| Network level                      | 3                               |
| Installation type                  | Underground                     |
| Protection class                   | IP68                            |
| Overlength management              | Depending on the shaft diameter |
| Chemical resistance                | Yes                             |
| Vibration strength                 | Yes                             |
| Impact resistance                  | IK07                            |
| Halogen-free                       | Yes                             |
| Temperature range storage          | -10 °C / +60°C                  |
| Temperature range installation     | -10 °C / +60°C                  |
| Temperature range during operation | -20 °C / +60°C                  |
| Length                             | 665 mm                          |
| Width                              | 325 mm                          |
| Height                             | 180 mm                          |
| Colour                             | Black / Silver                  |

Shafts made of plastic or concrete are usually used for underground branching of cable and conduit systems. With the help of the shaft sleeve holder, the fibre management plates (FMP) from KAISER GROUP are made suitable for use in all conventional shaft structures. All fibre management plates (FMP) of the KAISER GROUP are compatible with the shaft sleeve holder.

- Compatible with shaft structures made of plastic or concrete
- Compatible with all fibre management plates (FMP)
- Protection class IP68 (immersion bell principle)
- Simple and quick assembly (few components)
- Cable and conduit overlength can be placed in the shaft structure
