The new ThermoX® Lite product line is designed as a range of temperature-resistant housings for recessed lights. With its knock-in conduit entries, it is unique on the gypsum-fibre market. This range has been designed and tested for flexible installation of rigid and swivel luminaires with different mounting depths to ensure maximum durability.

- For installation in different ceiling constructions
- Knock-in conduit entries M20 & M25
- For luminaires and fixtures of all types
