

Facing concrete prena slabs

SICHTBETON

Facing concrete prena slabs 1x1

- For exposed concrete
- Neoprene seal for flexible sealing edge
- material: neoprene
- self-adhesive on one side

Article no:	9902.21.10
E-No:	155911155
EAN:	7611614437637
Length	80 mm
Width	80 mm
Depth	2 mm
Combination	1x1
Dispatch	20

The solution for exposed concrete!

The specially developed prepa plates made of 2 mm thick neoprene enable a clean transition when finishing between the concrete and the installation box. The plates prevent sanding out and discolouration by preventing concrete from flowing underneath. The Prenap panels have a strong adhesive surface on one side, which is glued to the junction boxes. This prevents the panels from slipping during the concreting phase.

- prevents concrete from flowing underneath, avoids discolouration and sanding out
- für exakte Abschlüsse bei Sichtbeton ohne weiteres Nacharbeiten
- for ceilings and walls
