AGRO flush-mounted box with glow wire test 850°C

AGRO flush-mounted box 2x2

· compatible with Feller SNAPFIX®
· New with strap attachment
· Increased installation volumes
· Simple alignment
· Separator wall for electrical circuit separation
· For device screws Ø 3 mm
· Max. tightening torque 0.5 Nm

Article no:	9902.24.850
E-No:	372633229
EAN:	7611614330051
Combination	2x2
Length	130.5 mm
Width	130.5 mm
Depth	66 mm
Conduit entries M20	8
Conduit entries M25	8
Combination conduit entries M20/25	4
Dispatch	12

The new lightweight boxes offer even more space for installation and wiring of actuators, WLAN modules and terminals.

Thanks to the additional lugs, the flush-mounted box can now also be installed in panelling/sheeting without connection to a timber stud. A comprehensive design with webs and stabilization walls increases strength while also facilitating safe separation of circuits.

A marker notch on each side of the box enables it to be easily aligned, both horizontally and vertically.

· compatible with Feller SNAPFIX®
· Additional lug attachment for panelling/sheeting without timber studs
· Increased stability thanks to comprehensive design concept
· Easy alignment using marker notches on each side
· FX4 lug bolts – the fastest screw fastening for flush-mounted boxes in lightweight construction
· Increased installation volumes for wiring
