

## Facing concrete prena slabs

SICHTBETON

## Facing concrete prena slabs 4x2

- For exposed concrete
- Neoprene seal for flexible sealing edge
- material: neoprene
- self-adhesive on one side

The solution for exposed concrete!

The specially developed prepa plates made of 2 mm thick neoprene enable a clean transition when finishing between the concrete and the installation box. The plates prevent sanding out and discolouration by preventing concrete from flowing underneath. The Prenap panels have a strong adhesive surface on one side, which is glued to the junction boxes. This prevents the panels from slipping during the concreting phase.

- prevents concrete from flowing underneath, avoids discolouration and sanding out
- für exakte Abschlüsse bei Sichtbeton ohne weiteres Nacharbeiten
- for ceilings and walls
